

Cassette type Nut Feeder

Cassette type Nut Feeder

It is specifically designed to feed square weld nuts and can be changed from M6 to M8 nuts very quickly - simply change the cassette, tube and feed unit. The bowl and the control unit are designed to feed a wide range of square nuts, rather than being dedicated to production using one size nut.

When ordering, the user should specify whether he wishes to feed several sizes and types of square nuts or specify a particular size, M5, M6, M8 or M10 and add components at a later date to feed a different nut size or type from M6 to M8 DIN or JIS (Japanese Industrial Standard)

Benefits

- High feed rate.automated production
- The nut is held at the end of the spear and magnetic foods safely at the same location on the angle and / or speed changes.

Other Benefits

- Vibrating nut sorted for all types of nuts.
- High and reliable feed rate > 1 sec
- Siemens PLC (Standard)
- Simple to use in manual or automated systems
- Volume refillable containers, 7 liters.
 - (M6 DIN = 8.000)
 - (M8 DIN = 4.000)
- CE - Marked

Capacity	Up to 60st / min
FeedStroke	200mm (standard)
Feed Angle	30 ° (default) 60 ° (Adjustable)
Power supply	110V 50Hz or 230V 50Hz
Control voltage	24V DC
Air Supply	5 bar
Standard	Bulk hopper, vinyl dust cover.
Options	300mm stroke Tube length, up to 9m
