

## Lerocon Multi Weld

Cycle Time Example:  
3 weld nuts in 5 seconds!

### Multi Weld Pneumatic

Multi Weld is a modular machine, specialized for automated production.

Multiple welding stations on one base frame for maximum flexibility. The software is prepared for 1-4 welding stations and the machine can also be custom made on request.

Together with Lerocon Rapid Feeder, this probably is the fastest machine available on the market!

#### Example of available options:

- 36 or 54kA Inverter MFDC
- 20 kN at 10bar Electrode force
- Height Adjustment
- Height Measurement
- Weld Force Measurement
- Beckhof or Siemens PLC
- Lerocon HMI operating panel
- M27 welding tool
- Guide pin retraction
- Guide pin measurement
- Lerocon Rapid Feeder
